FarmWorks Investment Co-operative Limited

Notes to the Financial Statements

Interim for the period June 1 to June 30, 2017 (Unaudited-See Notice to Reader)

1. Nature of operations

FarmWorks Investment Co-operative Limited (the "Co-operative") was incorporated on May 17, 2011, under the laws of Nova Scotia. The Co-operative provides subordinated debt funding to farms and food-related businesses to help increase the supply of local food, and the level of agricultural and related economic activity.

2. Significant Accounting Policies

Basis of accounting

The financial statements have been prepared in accordance with Accounting Standards for Private Enterprises.

Revenue recognition

Interest income is recognized over the term of the loans receivable.

Cash and cash equivalents

Cash and cash equivalents includes short-term investments and highly liquid investments in money market instruments which are carried at the lower of cost and market value with a maturity date of three months or less from the acquisition date. These are valued at cost which approximates market value.

Impairment of long lived assets

In the event that facts and circumstances indicate that the carrying amount of an asset may not be recoverable and an estimate of future undiscounted cash flows is less than the carrying amount of the asset, an impairment loss will be recognized. Management's estimates of revenues, operating expenses, and operating capital are subject to certain risks and uncertainties which may affect the recoverability of the co-operative's investments. Although management has made its best estimate of these factors based on current conditions, it is possible that changes could occur which could adversely affect management's estimate of the net cash flow expected to be generated from its operations.

Financial instruments

Transaction costs expensed

The co-operative recognizes all transaction costs related to financial assets and liabilities as a reduction to net income in the period in which the costs were incurred.

Fair values not materially different from book values

The co-operative has determined that the estimated fair value of the financial assets and liabilities do not differ considerably from their book value.

FarmWorks Investment Co-operative Limited

Notes to the Financial Statements

Interim for the period June 1 to June 30, 2017 (Unaudited-See Notice to Reader)

Significant Accounting Policies continued

Use of estimates

The preparation of financial statements in conformity with Canadian Accounting Standards for Private Enterprises requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the recognized amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant areas requiring the use of management estimates relate to the impairment of financial assets.

Financial instruments - Transaction costs expensed

The Co-operative recognized all transaction costs related to financial assets and liabilities as a reduction to net income in the period in which the costs were incurred.

3. Loans Receivable

	2017	2016
Loans receivable bearing interest at 6%, maturing from 2017 to 2027, at amortized cost.	1,280,209	1,053,085
Allowance for loan impairment	-36,000	-36,000
Total debt	1,244,209	1,017,085
Current portion of loans receivable, at amortized cost	295,435	252,744
	948,774	764,341

Principal amounts receivable over the next ten years are as follows:

June 2018	295,436
June 2019	289,283
June 2020	275,052
June 2021	214,946
June 2022	150,103
June 2023	27,433
June 2024	12,836
June 2025	9,798
June 2026	1,522
June 2027	3,800

4. Capital Stock

Authorized

The co-operative is authorized to issue common shares with a par value of \$100 each.

Issued	June 30, 2017	2016	2015	2014
Common Shares	\$1,769,600	\$1,400,700	\$1,028,400	\$721,000

FarmWorks Investment Co-operative Limited

Notes to the Financial Statements

Interim for the period June 1 to June 30, 2017 (Unaudited-See Notice to Reader)

Capital stock continued

Issuance of stock

On February 8, 2017, the Co-operative issued 3,537 common shares for cash consideration of \$353,700. In February 2017, mature shares in the amount of \$10,000 were refunded. An additional 252 shares have been issued since February 8, 2017 for \$25,200 cash consideration.

5. Financial instruments

Risks and concentrations

The co-operative is exposed to various risks through its financial instruments. The following analysis provides a measure of the co-operative's risk exposure as at June 3, 2016.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The co-operative is exposed to this risk mainly in respect of its payables and accruals.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The co-operative is exposed to this risk mainly in respect of its payables and accruals.

Concentration of credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Financial instruments which potentially subject the co-operative to concentrations of credit risk consist of loans receivable. The co-operative has loans receivable from clients engaged in farming and food-related industries in Nova Scotia. These industries may be affected by economic factors which may impact loans receivable.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. There were no foreign denominated transactions during the year.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The co-operative is exposed to interest rate risk on its financial instruments. Fixed-interest instruments subject the co-operative to a fair value risk, since fair value fluctuates inversely to changes in market interest rates. Floating rate instruments subject the co-operative to related cash flow risk. There are currently no floating rate instruments.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market
